The publication focuses on the different reliability assessment approaches, methodologies, analysis and evaluation of the results and technical challenges. It provides the insights resulting from the analysis on the technical issues associated with assessing the reliability of passive systems in the context of nuclear safety and probabilistic safety analysis. A viable path towards the implementation of the research efforts in the related areas is also delineated.

Cut Both Ways Carrie Mesrobian 2015-09-01 A TOP 10

RAINBOW LIST BOOK William C. Morris YA Debut Award

nominee Carrie Mesrobian delivers a "raw, sympathetic coming-of-age story [that] uncovers the messy, painful, yet vitally important process of self-discovery"

(Booklist, starred review) when a high school senior comes to terms with his attraction to both his girlfriend and his male best friend. It took Will Caynes seventeen years to have his first kiss. He should be ecstatic...except that it was with his best friend, Angus, while they were both drunk and stoned. Will's not gay,

but he did sort of enjoy whatever it was he felt with Angus. Unsettled by his growing interest in Angus, Will avoids his friend and even starts dating a sophomore, Brandy. When he's hooking up with her, he's totally into it, so he must be straight, right? Then why does he secretly keep going back to Angus? Confusing as Will's feelings are, they're a welcome distraction from his complicated home life. His father has started drinking earlier each day when he should be working on never-ending house renovations. And his mom-divorced and living in a McMansion with her new husband-isn't much help, unless she's buying Will a bunch of stuff he doesn't need. Between the two of them, neither feels like much of a parent-which leaves Will on his own in figuring things out with his girlfriend and best friend. He loves them both, but deciding who to be with will ultimately hurt someone. Himself, probably the most.

Ma Speaks Up Marianne Leone 2017-04-25 The acclaimed actress and author of *Jesse: A Mother's Story* tells the "entertaining and moving" story of her outspoken, frequently outrageous Italian immigrant mother (Tom Perrotta) Marianne Leone's *Ma* is in many senses a larger-than-life character, one who might be capable, even from the afterlife, of shattering expectations. Born on a farm in Italy, Linda finds her way to the United States under dark circumstances, having escaped a forced marriage to a much older man, and marries a good Italian boy. She never has full command of English—especially when questioned by authorities—and when she is suddenly widowed with three young children, she has few options. To her daughter's horror and misery, she becomes the school lunch lady. *Ma Speaks Up* is a record of growing up on the wrong side of the tracks, with the wrong family, in the wrong religion. Though Marianne's girlhood is flooded with shame, it's equally packed with adventure, love, great cooking, and, above all, humor. The extremely premature birth of Marianne's beloved son, Jesse, bonds mother and daughter in ways she couldn't have imagined. The stories she tells will speak to anyone who has struggled with outsider status in any form and, of course, to mothers and their blemished, cherished girls.

Calculus Tom M. Apostol 2019-04-26 An introduction to the Calculus, with an excellent balance between theory and technique. Integration is treated before differentiation--this is a departure from most modern texts, but it is historically correct, and it is the best way to establish the true connection between the integral and the derivative. Proofs of all the important theorems are given, generally preceded by geometric or intuitive discussion. This Second Edition introduces the mean-value theorems and their applications earlier in the text, incorporates a treatment of linear algebra, and contains many new and easier exercises. As in the first edition, an interesting historical introduction precedes each important new concept.

Vector Biology, Ecology and Control Peter W. Atkinson

2009-12-12 Mir S. Mulla joined the faculty of the Entomology Department at the University of California, Riverside in 1956, only two years after the Riverside campus was established as an independent campus within the University of California system. Prior to his appointment, Mir received his B.S. from Cornell University and then moved to the University of

California, Berkeley to pursue his graduate studies. His Ph.D. from Berkeley, awarded in 1955, completed his formal American education which was the purpose of his immigration from his native Kandahar in Afghanistan. In his over 50 years at Riverside, Mir has made an incalculable impact on vector biology both within the United States and in developing countries throughout the world. Within Southern California, Mir's basic and applied research led to the rapid and sustainable control of mosquitoes and eye gnats in the Coachella Valley and so directly enabled this region to grow to the thriving, large community it is today. In 2006 his efforts in facilitating the development of the low desert of southern California were recognized through the dedication of the Mir S. Mulla Biological Control Facility by the Coachella Valley Mosquito and Vector Control District. His success has been so profound that it remains somewhat cryptic to the many who now reside in, visit, and enjoy, this region of California, oblivious to the insect problems that severely restrained development until Mir and his students first applied their expertise many decades ago.
