Advancing Online Teaching Kevin Kelly

2020-12-14 The goal of teaching online is fundamentally the same as teaching face-to-face: facilitating the learning of all students to the greatest extent possible. This book differs from other books on online teaching in that, in the

process of offering guidance on course design and planning, developing outcomes and appropriate engaging activities, managing the workload and assessment, the authors pay explicit attention throughout to the distinct and diverse needs of students and offer effective strategies to accommodate them in a comprehensive and inclusive way by using the principles of Universal Design for Learning. By following those principles from the outset when planning a course, all students will benefit, and most particularly those whom the research shows have the greatest achievement gaps when taking

online courses -- males, first generation and low income students, those from underrepresented minority groups, the academically underprepared, students with disabilities, and those with limited online access or lacking readiness for online learning. Beyond good planning and design, Kelly and Zakrajsek offer ideas for creating inclusive course environments and activities, such as using culturally appropriate content and making it accessible in multiple formats. They also share methods to foster faculty-learner interaction and increase personal connections with students, and among students, through group activities or

learning communities, which are so critical to motivation and success. Faculty new to online teaching as well as more experienced readers will find a wealth of practical guidance on developing and honing both fully online and blended courses and, as importantly, a wealth of proven ideas to help the new generation of students with diverse needs to succeed.

Handbook of College and University Teaching

James E. Groccia 2012-01-17 Handbook of College and University Teaching: A Global Perspective presents international perspectives on critical issues impacting teaching and learning in diverse higher education environments, all with

a unique global view. The need to understand learning and teaching from multiple cultural perspectives has become critically important in educating the next generation of college students. Education experts from around the world share their perspectives on college and university teaching, illuminating international differences and similarities. The chapters are organized around a model developed by James Groccia, which focuses on seven interrelated variables, including teacher, learner, learning process, learning context, course content, instructional processes, and learning outcomes. Using this logical model

as the organizational structure of the book provides a guide for systemic thinking about what actions one should take, or suggest others take, when planning activities to improve teaching and learning, curriculum development, and assessment.

Teaching Literature-Based Instructional Units

Angela L. Hansen 2022-04-22 Teaching Literature-Based Instructional Units: From Planning to Assessment provides an accessible roadmap to planning, designing, and implementing literature-based instructional units for the English Language arts (ELA) classroom.

Understanding that unit plans are the building blocks of the ELA curriculum, Hansen and Vásquez outline the theoretical foundations and approaches behind teaching ELA and offer a framework to help readers make sound decisions about their content pedagogy. In so doing, this text offers research-based and straightforward guidance on planning instruction around key literary texts. Placing literature at the center of the ELA curriculum, the approaches in this book not only support students' reading, writing, listening, speaking, and digital media skills, but will also motivate and inspire them. Part 1 addresses how

to choose unit themes and texts, discusses the importance of having a rationale for choices made, and examines the practical, philosophical, and historical approaches to teaching literature. Part 2 provides step-by-step instructions for designing literature-based units of instruction by using backwards design. The text focuses on assessment before moving into how to scaffold and sequence lessons to meet learning objectives, and concludes with consideration given to teaching ELA in virtual environments. The wealth of activities, strategies, exercises, examples, and templates in this book make this

text essential reading for instructors and pre-service teachers in ELA pedagogical methods courses and for practicing teachers of literature instruction.

Encyclopedia of Educational Psychology Neil J. Salkind 2008-01-17 The field of educational psychology draws from a variety of diverse disciplines including human development across the life span, measurement and statistics, learning and motivation, and teaching. And within these different disciplines, many other fields are featured including psychology, anthropology, education, sociology, public health, school

psychology, counseling, history, and philosophy.

In fact, when taught at the college or university level, educational psychology is an ambitious course that undertakes the presentation of many different topics all tied together by the theme of how the individual can best function in an "educational" setting, loosely defined as anything from pre-school through adult education.

Educational psychology can be defined as the application of what we know about learning and motivation, development, and measurement and statistics to educational settings (both school- and community-based).

Assessment in the Second Language Writing

Classroom Deborah Crusan 2010-07-01

Assessment in the Second Language Writing Classroom is a teacher and prospective teacher-friendly book, uncomplicated by the language of statistics. The book is for those who teach and assess second language writing in several different contexts: the IEP, the developmental writing classroom, and the sheltered composition classroom. In addition, teachers who experience a mixed population or teach cross-cultural composition will find the book a valuable resource. Other books have thoroughly covered

the theoretical aspects of writing assessment, but none have focused as heavily as this book does on pragmatic classroom aspects of writing assessment. Further, no book to date has included an in-depth examination of the machine scoring of writing and its effects on second language writers. Crusan not only makes a compelling case for becoming knowledgeable about L2 writing assessment but offers the means

to do so. Her highly accessible, thought-provoking presentation of the conceptual and practical dimensions of writing assessment, both for the classroom and on a larger scale, promises to engage readers who have previously found the technical detail of other works on assessment off-putting, as well as those who have had no previous exposure to the study of assessment at all.
