Water Mills of the Missouri Ozarks

George G. Suggs 1990 In 19th and early 20th-century America, water mills were the center of the economic

and social life of small communities throughout the nation's calm, rural backwaters, including the Missouri Ozarks. Suggs (history, Southeast Missouri State U.) presents the

stories of 20 Ozarks water mills, and Jake Wells illustrates the vignettes with drawings and watercolors.

Undimmed Lustre Muriel Topaz 2002
Undimmed Lustre: The Life of Antony Tudor is a chronological biography of one of the most creative forces in dance of the 20th century. Born in 1908 in London, Tudor was raised in a lower middle class family on the streets of London's meat market district. Although he had no formal exposure to dance, he spent the first decade of his professional life as one of the founding members of the Ballet Rambert. In America, he became an all-important force and a prime mover in American Ballet Theatre for the most of its early history. His contributions to the development of the art of the classical ballet are inestimable, for he single-handedly introduced a new direction into the ballet world. Tudor imbued the

simplest gesture with profound meaning, bringing drama into "academic" ballet, by mixing classical vocabulary, Freudian ideas, and Stanislavkian methodology and cinematic techniques into his dances. Tudor's enigmatic personality, his English propriety mixed with his rapier-sharp and often vulgar wit, his insecurities, and his total inability to compromise artistically, all made him a controversial figure in the very communal dance world. This book, written by Muriel Topaz, student, colleague, notator, assistant, and long time friend of Tudor's, reveals the misconceptions and contradictions that have attached themselves to the artist. Based on never-before seen personal archives, correspondence, and copious interviews as well as grant-supported

research conducted in England, the United States, Sweden, Australia, Israel, Japan, and France, this work is a wonderful resource for dance teachers and students or anyone interested in classical ballet.

Jewel of the Desert Sandra C. Taylor
1993 In the spring of 1942, under the guise of "military necessity," the U.S. government evacuated 110,000 Japanese Americans from their homes on the West Coast. About 7,000 people from the San Francisco Bay Area--the vast majority of whom were American citizens--were moved to an assembly center at Tanforan Racetrack and then to a concentration camp in Topaz, Utah. Dubbed the "jewel of the desert," the camp remained in operation until October 1945. This compelling book tells the history of Japanese Americans of San Francisco and the Bay Area, and of their

experiences of relocation and internment. Sandra C. Taylor first examines the lives of the Japanese Americans who settled in and around San Francisco near the end of the nineteenth century. As their numbers grew, so, too, did their sense of community. They were a people bound together not only by common values, history, and institutions, but also by their shared status as outsiders. Taylor looks particularly at how Japanese Americans kept their sense of community and self-worth alive in spite of the upheavals of internment. The author draws on interviews with fifty former Topaz residents, and on the archives of the War Relocation Authority and newspaper reports, to show how relocation and its aftermath shaped the lives of these Japanese Americans. Written at a time when the

United States once again regards Japan as a threat, Taylor's study testifies to the ongoing effects of prejudice toward Americans whose face is also the face of "the enemy." Taken together, her paintings offer an insight into the daily life of a woman who would not abandon her art or betray her spirit. Ant Colony Optimization Marco Dorigo 2004-06-04 An overview of the rapidly growing field of ant colony optimization that describes theoretical findings, the major algorithms, and current applications. The complex social behaviors of ants have been much studied by science,

and computer scientists are now finding that these behavior patterns can provide models for solving difficult combinatorial optimization problems. The attempt to develop algorithms inspired by one aspect of ant behavior, the ability to find what computer scientists would call shortest paths, has become the field of ant colony optimization (ACO), the most successful and widely recognized algorithmic technique based on ant behavior. This book presents an overview of this rapidly growing field, from its theoretical inception to practical applications, including descriptions of many available ACO algorithms and their uses. The book first describes the translation of observed ant behavior into working optimization algorithms. The ant colony metaheuristic is then

introduced and viewed in the general context of combinatorial optimization. This is followed by a detailed description and guide to all major ACO algorithms and a report on current theoretical findings. The book surveys ACO applications now in use, including routing, assignment, scheduling, subset, machine learning, and bioinformatics problems. AntNet, an ACO algorithm designed for the network routing problem, is described in detail. The authors conclude by summarizing the progress in the field and outlining future research directions. Each chapter ends with bibliographic material, bullet points setting out important ideas covered in the chapter, and exercises. Ant Colony Optimization will be of interest to academic and industry researchers, graduate students, and

practitioners who wish to learn how to implement ACO algorithms.
The Illustrated Guide to Assistive Technology & Devices Suzanne Robitaille 2009-12-08 A Doody's Core Title 2012 This new illustrated guide to assistive technologies and devices chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. This book empowers people to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.
W-Sn Skarn Deposits and Related

Metamorphic Skarns and Granitoids
Teunis A. P. Kwak 1987 Intended as a reference for the academically-oriented geologist as well as the practising economic geologist, this book is concerned with the study of skarn deposits having anomalously high tin or tungsten contents, or both. Unlike many other books on economic geology, both economic W-Sn skarns and non-economic examples are covered, in order to enable the academically-oriented reader to grasp the full range of such deposits, and also to aid the economic geologist in distinguishing between W-Sn skarns having economic potential and those which do not. W-Sn skarns are notoriously complex, containing a wide range of textures, grain sizes, mineral assemblages, bulk compositions and structures. The lack

of a sufficiently detailed data base, coupled with some unsupportable genetic models, has led to many misunderstandings and has often resulted in needless expenditure and effort on fruitless mineral exploration. Thus, the first aim of this book is simply to provide an adequate data base with sufficient references to enable an interested worker to define a skarn deposit and know where to find additional information on similar examples.

Mrs. Keppel and Her Daughter Diana Souhami 2014-10-14 Alice Keppel, the married lover of Queen Victoria's eldest son and great-grandmother to Camilla Parker-Bowles, was a key figure in Edwardian society. Hers was

the acceptable face of adultery. Discretion was her hallmark. It was her art to be the king's mistress and yet to laud the Royal Family and the institution of marriage. Formidable and manipulative, her attentions to the king brought her wealth, power, and status. Her daughter Violet Trefusis had a long tempestuous affair with the author and aristocrat Vita Sackville-West, during which Vita left her husband and two sons to travel abroad with Violet. It was a liaison that threatened the fabric of Violet's social world, and her passion and recalcitrance in pursuit of it pitted her against her mother and society. From memoirs, diaries, and letters, Diana Souhami portrays this fascinating and intense mother/daughter relationship in Mrs. Keppel and Her Daughter. Her story of

these women, their lovers, and their lovers' mothers, highlights Edwardian - and contemporary - duplicity and double standards and goes to the heart of questions about sexual freedoms.

Hitchcock Nonetheless Marc Strauss 2007 Often glossed over by scholars and Hitchcock aficionados, the fifteen films in this book -- "Juno and the Paycock, The Skin Game, Waltzes from Vienna, Jamaica Inn, The

Paradine Case, Under Capricorn, I Confess, Torn Curtain, Number 17, Rich and Strange, Secret Agent, Mr. and Mrs. Smith, Stage Fright, The Wrong Man," and "Topaz" -- are discussed and analyzed in detail, revealing the master's touch in many previously unheralded ways.

Hitchcock's Motifs Michael Walker 2005 Among the abundant Alfred Hitchcock literature, Hitchcock's

Motifs has found a fresh angle. Starting from recurring objects, settings, character-types and events, Michael Walker tracks some forty motifs, themes and clusters across the whole of Hitchcock's oeuvre, including not only all his 52 extant feature films but also representative episodes from his TV series. Connections and deeper inflections that Hitchcock fans may have long sensed or suspected can now be seen for what they are: an intricately spun web of cross-references which gives this unique artist's work the depth, consistency and resonance that justifies Hitchcock's place as probably the best know film director ever. The title, the first book-length study of the subject, can be used as a mini-encyclopaedia of Hitchcock's motifs, but the

individual entries also give full attention to the wider social contexts, hidden sources and the sometimes unconscious meanings present in the work and solidly linking it to its time and place. **Guide to Foreign and International Legal Citations** 2006 "Formerly known as the International Citation Manual"--p. xv. **Monthly Catalog of United States Government Publications** United States. Giovanna's 86 Circles Paola Corso
2005-08-30 These ten magical stories
are primarily set in Pittsburgh-area
river towns, where Italian American
women and girls draw from their
culture and folklore to bring life
and a sense of wonder to a seemingly
barren region of the Rust Belt. Each
story catapults the ordinary into
something original and unpredictable.
A skeptical journalist scopes out the
bar where the town mayor, in
seemingly perfect health, is drinking
with his buddies and celebrating what
he claims is the last day of his
life. A woman donates her dead
mother's clothes to a thrift shop but
learns that their destiny is not what

she expected. A ten-year-old girl
wrestles with the facts of life as
she watches her neighbor struggle to
get pregnant while her teenage sister
finds it all too easy. A high school
girl hallucinates in a steamy
hospital laundry room and discovers
she can see her coworkers' futures. A
developer's wrecking ball is no match
for the legend of Giovanna's green
thumb in the title story "Giovanna's
86 Circles." Quirky and profound,
Corso's magical leaps uncover the
everyday poetry of these women's
lives. Finalist for the John Gardner
