Principles and Practice in Second Language Acquisition Stephen D.

Krashen 1982 The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective

materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

The Most Dangerous Game Richard Connell 2021-01-01 ♥♥ The Most Dangerous Game by Richard Connell ♥♥ The Most Dangerous Game, also published as *The Hounds of Zaroff*, is

a short story by Richard Connell first published in *Collier's* magazine on January 19, 1924. It features a big-game hunter from New York who falls off a yacht and swims to an isolated island in the Caribbean where he is hunted by a Cossack aristocrat. The story is an adaptation of the big-game hunting safaris in Africa and South America that were fashionable among wealthy Americans in the 1920s. ♥♥ *The Most Dangerous Game* by Richard Connell ♥♥ Big-game hunter Sanger Rainsford and his friend, Whitney, are traveling to the Amazon rainforest for a jaguar hunt. After a discussion about how they are "the hunters" instead of "the hunted," Whitney goes to bed and Rainsford hears gunshots. He climbs onto the yacht's rail and accidentally falls overboard,

swimming to Ship-Trap Island, which is notorious for shipwrecks. On the island, he finds a palatial chateau inhabited by two Cossacks: the owner, General Zaroff, and his gigantic deaf-mute servant, Ivan. ♥♥ The Most Dangerous Game by Richard Connell ♥♥ Zaroff, another big-game hunter, knows of Rainsford from his published account of hunting snow leopards in Tibet. Over dinner, the middle-aged Zaroff explains that although he has been hunting animals since he was a boy, he has decided that killing big-game has become boring for him, so after escaping the Russian Revolution he moved to Ship-Trap Island and set it up to trick ships into wrecking themselves on the jagged rocks that surround it. He takes the survivors captive and hunts them for sport, giving them food, clothing, a knife,

and a three-hour head start, and using only a small-caliber pistol for himself. Any captives who can elude Zaroff, Ivan, and a pack of hunting dogs for three days are set free. He reveals that he has won every hunt to date. Captives are offered a choice between being hunted or turned over to Ivan, who once served as official knouter for The Great White Czar. Rainsford denounces the hunt as barbarism, but Zaroff replies by claiming that "life is for the strong." Realizing he has no way out, Rainsford reluctantly agrees to be hunted. During his head start, Rainsford lays an intricate trail in the forest and then climbs a tree. Zaroff finds him easily, but decides to play with him as a cat would with a mouse, standing underneath the tree Rainsford is hiding in, smoking a

cigarette, and then abruptly departing. ♥♥ The Most Dangerous Game by Richard Connell ♥♥ After the failed attempt at eluding Zaroff, Rainsford builds a Malay man-catcher, a weighted log attached to a trigger. This contraption injures Zaroff's shoulder, causing him to return home for the night, but he shouts his respect for the trap before departing. The next day Rainsford creates a Burmese tiger pit, which kills one of Zaroff's hounds. He sacrifices his knife and ties it to a sapling to make another trap, which kills Ivan when he stumbles into it. To escape Zaroff and his approaching hounds, Rainsford dives off a cliff into the sea; Zaroff, disappointed at Rainsford's apparent suicide, returns home. Zaroff smokes a pipe by his fireplace, but two issues keep him

from the peace of mind: the difficulty of replacing Ivan and the uncertainty of whether Rainsford perished in his dive.

The Cult of Smart Fredrik deBoer 2020-08-04 Named one of Vulture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that

our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should

be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

Dancing in the Streets Barbara Ehrenreich 2007-12-26 From the bestselling social commentator and cultural historian comes Barbara Ehrenreich's fascinating exploration of one of humanity's oldest traditions: the celebration of communal joy In the acclaimed Blood Rites, Barbara Ehrenreich delved into the origins of our species' attraction to war. Here, she explores the opposite impulse, one that has been so effectively suppressed that we lack even a term for it: the desire for collective joy, historically expressed in ecstatic revels of feasting, costuming, and dancing. Ehrenreich uncovers the

origins of communal celebration in human biology and culture. Although sixteenth-century Europeans viewed mass festivities as foreign and "savage," Ehrenreich shows that they were indigenous to the West, from the ancient Greeks' worship of Dionysus to the medieval practice of Christianity as a "danced religion." Ultimately, church officials drove the festivities into the streets, the prelude to widespread reformation: Protestants criminalized carnival, Wahhabist Muslims battled ecstatic Sufism, European colonizers wiped out native dance rites. The elites' fear that such gatherings would undermine social hierarchies was justified: the festive tradition inspired French revolutionary crowds and uprisings from the Caribbean to the American plains. Yet outbreaks of group

revelry persist, as Ehrenreich shows, pointing to the 1960s rock-and-roll rebellion and the more recent "carnivalization" of sports. Original, exhilarating, and deeply optimistic, *Dancing in the Streets* concludes that we are innately social beings, impelled to share our joy and therefore able to envision, even create, a more peaceable future. "Fascinating . . . An admirably lucid, level-headed history of outbreaks of joy from Dionysus to the Grateful Dead."—Terry Eagleton, *The Nation*

Auster’s greatest, most heartbreaking
and satisfying novel—a sweeping and
surprising story of birthright and
possibility, of love and of life
itself. Nearly two weeks early, on
March 3, 1947, in the maternity ward
of Beth Israel Hospital in Newark,
New Jersey, Archibald Isaac Ferguson,
the one and only child of Rose and
Stanley Ferguson, is born. From that
single beginning, Ferguson’s life
will take four simultaneous and
independent fictional paths. Four
identical Fergusons made of the same
DNA, four boys who are the same boy,
go on to lead four parallel and

entirely different lives. Family fortunes diverge. Athletic skills and sex lives and friendships and intellectual passions contrast. Each Ferguson falls under the spell of the magnificent Amy Schneiderman, yet each Amy and each Ferguson have a relationship like no other.

Meanwhile, readers will take in each Ferguson's pleasures and ache from each Ferguson's pains, as the mortal plot of each Ferguson's life rushes on. As inventive and dexterously constructed as anything Paul Auster has ever written, yet with a passion for realism and a great tenderness and fierce attachment to history and to life itself that readers have never seen from Auster before. 4 3 2 1 is a marvelous and unforgettably affecting tour de force.

System 1 is fast,

intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how choices are made in both our business and our personal lives—and how we can use different techniques to guard

against the mental glitches that often get us into trouble. Winner of the National Academy of Sciences Best Book Award and the Los Angeles Times Book Prize and selected by The New York Times Book Review as one of the ten best books of 2011, *Thinking, Fast and Slow* is destined to be a classic.
