Choose a Better Path Kent Darcie 2019-06-06

Millions of adults have divorced parents. Choose a Better Path provides thought-provoking, helpful, and healing information for adult children

of divorce in a user-friendly format. Through workshops, interviews, articles, and international radio programs, Kent Darcie helps adults with divorced parents apply God's healing to triggers, fears, trust issues, anger, father hunger, unforgiveness, and the fallout from gray divorce (empty-nest parents splitting up). As a

researcher, author, speaker, therapist, and adult with divorced parents, Kent brings a wealth of information and tools to those who struggle when dealing with parents, steps, ex-steps, and the menagerie of players that come and go in the years that follow the divorce. While never bashing or demeaning divorced parents or others, Kent does tackle the tough and often subtle issues that damage the relationships and marriages of adult children of divorce. If you, or someone you know, have divorced parents, reading *Choose a Better Path* is an important step toward breaking the cycle of divorce.

Visions of Tragedy in Modern American

Drama David Palmer 2018-02-08 This volume responds to a renewed focus on tragedy in theatre and literary studies to explore conceptions of tragedy in the dramatic work of seventeen canonical American playwrights. For students of American literature and theatre studies, the assembled essays offer a clear framework for exploring the work of many of the

most studied and performed playwrights of the modern era. Following a contextual introduction that offers a survey of conceptions of tragedy, scholars examine the dramatic work of major playwrights in chronological succession, beginning with Eugene O'Neill and ending with Suzan-Lori Parks. A final chapter provides a study of American drama since 1990 and its ongoing engagement with concepts of tragedy. The chapters explore whether there is a distinctively American vision of tragedy developed in the major works of canonical American dramatists and how this may be seen to evolve over the course of the twentieth century through to the present day. Among the playwrights whose work is examined are: Susan Glaspell, Langston Hughes, Tennessee Williams, Arthur Miller, Edward Albee, Lorraine Hansberry, Amiri Baraka, August Wilson, Marsha Norman and Tony Kushner. With each chapter being short enough to be assigned for weekly classes in survey courses, the volume will help to facilitate critical

engagement with the dramatic work and offer readers the tools to further their independent study of this enduring theme of dramatic literature.

The English Ode from Milton to Keats

George N. Shuster 1940 Examines the English ode as it was written during the period extending from the middle of the seventeenth century to the middle of the nineteenth century and considers the development of the form and uses to which it was put by writers who varied considerably in outlook, inspiration, and ability in order to present a history of the English ode, to consider the special values of the form, and to weigh the effect ode writing had upon the prosody of lyric verse.

Laser-Driven Particle Acceleration Towards

Radiobiology and Medicine Antonio Giulietti

2016-05-04 This book deals with the new method of laser-driven acceleration for application to radiation biophysics and medicine. It provides multidisciplinary contributions from world leading scientist in order to assess the state of the art of innovative tools for radiation biology research and medical applications of ionizing radiation. The book contains insightful contributions on highly topical aspects of spatio-temporal radiation biophysics, evolving over several orders of magnitude, typically from femtosecond and sub-micrometer scales. Particular attention is devoted to the emerging technology of laser-driven particle accelerators and their application to spatio-temporal radiation biology and medical physics, customization of non-conventional and selective radiotherapy and optimized radioprotection protocols.

The Ultimate Betrayal Kimberla Lawson Roby 2015-06-09 "Roby's highly engaging prose offers edgy characters and intense drama." - Booklist

It's been four years since twenty-eight-year old Alicia Black, daughter of Reverend Curtis Black, divorced her second husband, the most womanizing and corrupt man she has ever known. Since then, Alicia has been dating her first husband, Phillip Sullivan, a wonderfully kind and true man of God whom she'd hurt terribly by cheating on him. Alicia has worked hard to prove herself worthy of his trust once more, and when he asks her to marry him again, she couldn't be happier. But Levi Cunningham, the drug dealer Alicia had an extramarital affair with, has just been released from prison, and he has completely turned his life around for the better. Still head-over-heels in love with Alicia, he will do whatever is necessary to win her back. Remarrying Phillip is the one thing Alicia has wanted for years, but she can't get Levi out of her mind. Alicia and Phillip aren't the only ones in the middle of a crisis. Their best friends, husband and wife Brad and Melanie Richardson, are struggling to keep their marriage together.

Workaholic Brad is never home and has begun losing thousands on bad investments. Or so he says. Melanie, who is certain there's more to the story, is determined to get at the truth. Fresh betrayal leads to consequences no one saw coming, and Alicia's relationship with Phillip might not be the only thing that needs saving. But is it already too late? Email: kim@kimroby.com

Recreation as a Developmental Experience:

Theory Practice Research Lawrence R. Allen

2011-07-26 It's not all "fun and games." A

growing body of research suggests that recreation activities can be powerful development

contexts when they are properly framed and intentionally designed. This volume highlights

much of that research, and the articles that follow provide ample evidence that well-framed

recreation activities and contexts can provide a range of positive developmental outcomes.

Editors Lawrence R. Allen and Robert J. Barcelona draw on their own work in human and youth development and have assembled contributing

authors who explore the important of meaningful recreation and leisure experiences in the lives of youth and the value of recreation from a developmental perspective. Chapters focus on the developmental potential of specific recreation contexts and settings and provide research and evidence-based strategies outlining the activities that best promote positive youth development. Finally, the volume demonstrates how recreation is being used to strengthen individual and community assets and its role as a contributor in addressing pressing social issues. This is the 130th volume of *New Directions for Youth Development*, the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions. The result is a unique resource presenting thoughtful, multi-faceted approaches to helping our youth develop into responsible, stable, well-rounded citizens.

Automating Science and Engineering Laboratories with Visual Basic Mark F. Russo
1999-03-31 A Volume in the Wiley-Interscience Series on Laboratory Automation. The complete, step-by-step guide to using Visual Basic(r) in a laboratory setting Visual Basic(r) is fast becoming the de facto laboratory programming language, yet existing books typically discuss applications that have nothing to do with science and engineering. This primer fills the gap in the field,

showing professionals seeking to improve the productivity of their laboratories how to use Visual Basic(r) to automate laboratory processes. Automating Science and Engineering Laboratories with Visual Basic(r) helps laboratory professionals decide when and if to use Visual Basic(r) and how to combine it with the many computing technologies used in modern laboratories such as RS-232 port communications, TCP/IP networking, and event-driven control, to name a few. With an emphasis on getting readers programming immediately, the book provides clear guidelines to the appropriate programming techniques as well as custom-developed software tools. Readers will learn how to build applications to control laboratory instruments, collect and process experimental data, create interactive graphical applications, and more. Boasting many working examples with the complete source code and backward compatibility to previous versions of Visual Basic(r), Automating Science and

Engineering Laboratories with Visual Basic(r) is an indispensable teaching tool for nonprogrammers and a useful reference for more experienced practitioners.

Ocean City, New Jersey Mark McLaughlin
1999-03-01 From the early 1900s through the 1950s, the postcard was an extraordinarily popular means of communication, and many of the postcards produced during this "golden age" can today be considered works of art. Postcard photographers traveled the length and breadth of the nation snapping photographs of busy street scenes, documenting local landmarks, and assembling crowds of local children only too happy to pose for a picture. These images, printed as postcards and sold in general stores across the country, survive as telling reminders of an important era in America's history. This fascinating new history of Ocean City, New Jersey, showcases more than two hundred of the best vintage postcards available. Images in this collection date between 1879 and 1950.
