Day of Empire Amy Chua 2007-10-30 In a little over two centuries, America has grown from a regional power to a superpower, and to what is today called a hyperpower. But can America retain its position as the world's dominant power, or has it already begun to decline? Historians have debated the rise and fall of empires for centuries. To date, however, no one has studied the far rarer phenomenon of hyperpowers—those few societies that amassed such extraordinary military and economic might that they essentially dominated the world. Now, in this

sweeping history of globally dominant empires, bestselling author Amy Chua explains how hyperpowers rise and why they fall. In a series of brilliantly focused chapters, Chua examines history's hyperpowers—Persia, Rome, Tang China, the Mongols, the Dutch, the British, and the United States—and reveals the reasons behind their success, as well as the roots of their ultimate demise. Chua's unprecedented study reveals a fascinating historical pattern. For all their differences, she argues, every one of these world-dominant powers was, at least by the standards of its time, extraordinarily pluralistic and tolerant. Each one succeeded by harnessing the skills and energies of individuals from very different backgrounds, and by attracting and exploiting highly talented groups that were excluded in other societies. Thus Rome allowed Africans, Spaniards, and Gauls alike to rise to the highest echelons of power, while the "barbarian" Mongols conquered their vast domains only because they practiced an ethnic and religious tolerance unheard of in their

time. In contrast, Nazi Germany and imperial Japan, while wielding great power, failed to attain global dominance as a direct result of their racial and religious intolerance. But Chua also uncovers a great historical irony: in virtually every instance, multicultural tolerance eventually sowed the seeds of decline, and diversity became a liability, triggering conflict, hatred, and violence. The United States is the quintessential example of a power that rose to global dominance through tolerance and diversity. The secret to America's success has always been its unsurpassed ability to attract enterprising immigrants. Today, however, concerns about outsourcing and uncontrolled illegal immigration are producing a backlash against our tradition of cultural openness. Has America finally reached a "tipping point"? Have we gone too far in the direction of diversity and tolerance to maintain cohesion and unity? Will we be overtaken by rising powers like China, the EU or even India? Chua shows why American power may have already exceeded its limits and why it may be in our interest to retreat from our go-it-alone approach and promote a new multilateralism in both domestic and foreign affairs.

The History and Future of Technology Robert U. Ayres 2021 Eminent physicist and economist, Robert Ayres, examines the history of technology as a change agent in society, focusing on societal roots rather than technology as an autonomous, self-perpetuating phenomenon. With rare exceptions, technology is developed in response to societal needs that have evolutionary roots and causes. In our genus Homo, language evolved in response to a need for our ancestors to communicate, both in the moment, and to posterity. A band of hunters had no chance in competition with predators that were larger and faster without this type of organization, which eventually gave birth to writing and music. The steam engine did not leap fully formed from the brain of James Watt. It evolved from a need to pump water out of coal mines, driven by a need to burn

coal instead of firewood, in turn due to deforestation. Later, the steam engine made machines and mechanization possible. Even quite simple machines increased human productivity by a factor of hundreds, if not thousands. That was the Industrial Revolution. If we count electricity and the automobile as a second industrial revolution, and the digital computer as the beginning of a third, the world is now on the cusp of a fourth revolution led by microbiology. These industrial revolutions have benefited many in the short term, but devastated the Earth's ecosystems. Can technology save the human race from the catastrophic consequences of its past success? That is the question this book will try to answer.

AK47: The Story of the People's Gun Michael Hodges 2008-03-20 In the sixty years since General Kalashnikov created the AK's distinctive silhouette, the gun has been at the centre of conflicts across the Middle East, Africa and Latin America. The weapon that made him a 'Hero of the Soviet Union' has also appeared on t-shirts and vodka bottles, featured in videos and song lyrics and been re-fashioned in crystal - a gift from Putin to George W. Bush. Power, politics and passion combine in the story of a weapon that has shaped the modern world. Using testimonies of people who have experienced the gun at first-hand - including a Sudanese child soldier, a Vietcong veteran and a Yorkshire teenager - Michael Hodges provides a compelling account of how the AK47 became an icon that ranks alongside Coca-Cola as one of the most recognisable brands in the world.

Japan and the Global Automotive Industry Koichi Shimokawa 2010-06-03 The Japanese automotive industry enjoyed spectacular success in the 1980s. This was largely due to the so-called 'Lean Production System' - the combination of an efficient production system, an effective supplier system, and a product development system. In the 1990s the industry fell on hard times because of the Japanese asset price bubble and extreme currency appreciation. In this book, eminent industry specialist Koichi Shimokawa draws on his thirty years of research and fieldwork with Japanese and American firms, to show how the Japanese automotive industry has managed to recover from this difficult period. He shows how firms like Toyota were able to transfer Japanese systems to overseas plants and how they have changed in order to compete in increasingly globalized markets. In addition, the book also addresses the two major challenges to the current industry model: the rise of China and the environmental and energy supply situation.

Web of Debt Ellen Hodgson Brown 2012 "Web of Debt" unravels deceptions about the money system and presents a crystal-clear picture of the upcoming financial abyss. The text also explores a workable alternative, one that was tested in colonial America and is grounded in the best of American economic thought, including the writings of Benjamin Franklin, Thomas Jefferson, and Abraham Lincoln.

Grenada International Monetary Fund 1995-07-20 This paper describes economic developments in Grenada during the 1990s. The weak growth performance since 1990

reflected largely a continuous contraction in agricultural output, which declined each year from 1989 to 1993. The construction industry experienced a major contraction in 1992 owing to the sharp fall in public investment. In 1993, output declined in the mining and quarrying, construction, and manufacturing sectors as well as in agriculture. In contrast, the hotel and restaurant sector has exhibited strong growth since the late 1980s, with real value added growing by 13.8 percent, on average, each year since 1989.

How Posters Work Ellen Lupton 2015 *How Posters Work* is more than a standard exhibition catalogue. Conceived as a useful and illuminating primer in visual thinking, it explores principles of design through a range of historical and contemporary works, uncovering ideas relevant not just to the design of posters but to 2D design more generally. *How Posters Work* has a unique focus on visual language. Rather than provide a history of the genre or a compilation of collectibles, the book is organized around active design principles. Concepts such as "Simplify," "Focus the eye," "Exploit the diagonal," "Reverse expectations," and "Say two things at once" are illustrated with a diverse range of posters, from avant-garde classics and rarely seen international works to contemporary pieces by today's leading graphic designers. Illustrated with over 150 works from the collection of Cooper Hewitt, Smithsonian Design Museum, *How Posters Work* provides a stunning

education in seeing and making, demonstrating how some of the world's most creative designers have mobilized principles of layout, composition, psychology, and rhetoric to produce powerful acts of visual communication

More Than the Truth Ian Ward 2019-08-07 The inspirational success story of the first 100 years of Hutchinson Builders. What started out as a one-man band in 1912, when an English immigrant builder arrived with his family to start a new life in Australia, has grown into the country's largest privately owned construction company. The Hutchies' story straddles a century that witnessed two world wars, the great depression and tumultuous cycles of financial crises against the back drop of the rough and tumble world of construction. As well as tracking the survival and eventual growth of Hutchies into the dynamic and well respected company of today, the book outlines its evolution through successive generations of Jack Hutchinsons at the helm

with a fifth generation poised to take on that role. That story is told by way of a historical account as well as captured through the republication and inclusion of every back issue of "Hutchies' Truth", the company's colourful, tabloid-style newsletter covering those years.

Kingdom of Twilight Steven Uhly 2018-08-07 A "powerful and original" (The Times) historical saga that follows the quest for identity, redemption and home in the wake of World War II. One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An SS officer is shot dead by a young Polish Jew, Margarita Ejzenstain. In retaliation, his commander orders the execution of thirty-seven Poles--one for every year of the dead man's life. First hidden by a sympathetic German couple, Margarita must then flee the brutal advance of the Soviet army with her newborn baby.

So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. Kingdom of Twilight follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a former SS officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from refugee camps to Lübeck, Berlin, Tel Aviv, and New York, as they try to make sense of a changed world, and of their place in it. Hypnotically lyrical and intensely moving, Steven Uhly's epic novel is a finely nuanced yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity, and redemption.

Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. Journal of International Business Studies This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for

academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese

The Global Environment of Business David W. Conklin 2010-05-06 This text provides upper-level undergraduate students with an international managerial perspective that concisely integrates both market (i.e., industry structure) and nonmarket (i.e., political forces) analysis. Conklin teaches students how to understand the

impact of environmental forces on the firm's profitability, how to prioritize both risks and opportunities, how to analyze the relationships among them, and how to recommend firm responses to them to maximize MNE profitability. Key Features Environmental forces and their interrelationships are clearly organized and analyzed under four broad themes: social, technological, economic, and political forces. Each issue is clearly correlated to real management decision-making in chapter introductions, which discuss the strategies and management practices required to respond effectively to various environmental forces. Students learn to assess the changes in environmental forces over time and to ascertain the relative attractiveness of various nations as alternative sites for conducting business. Chapter-opening lists of critical skills and capabilities provide a focus and guide for the material in the chapter, relating theories to practical applications. Chapter-ending case excerpts with discussion questions provide illustrative real-world situations related to issues presented in that chapter and challenge students to come up with their own recommended solutions.
