The Christian Delusion John W. Loftus 2010 In this anthology of recent criticisms aimed at the reasonableness of Christian belief, former evangelical minister and apologist Loftus has

assembled fifteen outstanding articles by leading skeptics, expanding on themes introduced in Loftus' first book.

Handbook of Behavioural Economics and Smart Decision-Making Morris Altman 2017-05-26 This

Downloaded from avnrichdefi.com on
September 25, 2022 by guest

Handbook is a unique and original contribution of over thirty chapters on behavioural economics, examining and addressing an important stream of research where the starting assumption is that decision-makers are for the most part relatively smart or rational. This particular approach is in contrast to a theme running through much contemporary work where individuals' behaviour is deemed irrational, biased, and error-prone, often due to how people are hardwired. In the smart people approach, where errors or biases occur and when social dilemmas arise, more often than not, improving the decision-making environment can repair these problems without hijacking or manipulating the preferences of decision-makers. This book covers a wide-range of themes from micro to macro, including various sub-disciplines within economics such as economic psychology, heuristics, fast and slow-thinking, neuroeconomics, experiments, the capabilities approach, institutional economics,

methodology, nudging, ethics, and public policy. When the Servant Becomes the Master Jason Z.W. Powers 2018-01-12 Dr. Jason Powers has fully updated and revised his myth-busting compendium with contemporary neuroscience and state-of-the-art information. In addition to knowledge gained from his own practice, Dr. Powers includes various forms of evidence-based, best practices addiction treatments and humanizes the disease within a framework of research and personal experience.

Junior Ray Donley 2012 JOSHUA WAS SHOCKED TO HEAR HIS FATHER'S VOICE ON THE RECORDING. "Junior! How's it hanging, young man? If you are listening to this, that means I am dead and you are alive, which is of course exactly how I planned it. Yes, I knew the explosion was going to happen, and I made sure you and Pete were out of town when it did . . . Junior, first let me say that I am sorry about what happened. Second, I am sorry everyone is blaming you. Unfortunately, things are gonna

get worse before they get better. But you have Jennings blood running through your veins, boy, and I know you can handle whatever happens. You are my only son and I love you very much. " Thirty-year-old Joshua Jennings Jr. is the last living member of his family and the primary suspect in a terrorist bombing that killed the president, the vice president, and his own father. To make matters worse, Joshua discovers that his father planned the explosion and set up Joshua to take the blame. Overnight, the media transforms Joshua into a celebrity criminal. He rockets to first place in the Criminal Fantasy League standings. Feature films and bestsellers explore his motives for blowing up the president. A television personality proclaims Joshua's innocence so she can market "Let Him Be" T-shirts. the Baptist News Channel announces that Joshua is the Antichrist, and that the end of the world is near. "Junior" is Joshua's journal. It chronicles his three years as a fugitive on the run from law enforcement and vigilantes while

he tries to figure out how he fits into his father's plan. When Joshua mysteriously disappears, the journal is discovered and becomes a worldwide bestseller, described by scholars and literary critics as "a classic study of the human condition." www.juniorthebook.com
IS JESUS CHRIST GOD? Rev. Henry A. Idonije 2013-11 How much are you worth? The answer: John 3:16. His thoughts toward you: God thinks you are worth the death of his son.
[CSB Apologetics Study Bible for Students](#) CSB Bibles by Holman 2017-10-02 Now updated with even more material, the CSB Apologetics Study Bible for Students anchors young Christians in the truths of Scripture and equips them with thoughtful responses when the core issues of their faith are challenged. The resources in this student Bible were curated by general editor Dr. Sean McDowell, and the core materials in the Bible explore over 130 of the top questions students are asking today. This student study Bible is updated with new articles and extensive

apologetics study material from today's most popular youth leaders and apologists to reflect relevant apologetics issues and questions of today. This student Bible is uniquely created to encourage students to ask tough questions, get straight answers, and see their faith strengthened as they engage in Bible study and with others around them. The features in this study Bible include: Presentation page, Book introductions, Study notes, Articles from popular youth leaders and Christian apologetics leaders (including editor Sean McDowell), Sixty "Twisted Scripture" explanations for commonly misunderstood passages, Fifty "Bones & Dirt" entries (archaeology meets apologetics), Fifty "Notable Quotes," Twenty-five "Tactics" against common anti-Christian arguments, Twenty "Personal Stories" of how God has worked in real lives, Twenty "Top Five" lists to help remember key apologetics topics, Two-color design-intensive interior, Two-column text, 9.75-point type, Smyth-sewn binding, Ribbon marker,

Full-color maps, and more. The CSB Apologetics Study Bible for Students features the highly readable, highly reliable text of the Christian Standard Bible® (CSB). The CSB translation used in this apologetics Bible stays as literal as possible to the Bible's original meaning without sacrificing clarity, making it easier to engage with Scripture's life-transforming message and to share it with others.

(CSB). The CSB stays as literal as possible to the Bible's original meaning without sacrificing clarity, making it easier to engage with Scripture's life-transforming message and to share it with others.

God? William Lane Craig 2003-09-18 The question of whether or not God exists is profoundly fascinating and important. Now two articulate spokesmen--one a Christian, the other an atheist--duel over God's existence in an illuminating battle of ideas. In *God? A Debate between a Christian and an Atheist*, William Lane Craig and Walter Sinnott-Armstrong bring to the printed page two debates they held before live audiences, preserving all the wit, clarity, and immediacy of their public exchanges. Avoiding overly esoteric arguments, they directly address issues such as religious experience, the Bible, evil, eternity, the origin of the universe, design, and the supposed connection between morality and the existence of God. Employing sharp and humorous

arguments, each philosopher strikes quickly to the heart of his opponent's case. For example, Craig claims that we must believe in God in order to explain objective moral values, such as why rape is wrong. Sinnott-Armstrong responds that what makes rape wrong is the harm to victims of rape, so rape is immoral even if there is no God. By assuming a traditional concept of God in their discussion, the authors ensure that they are truly addressing each other's viewpoints and engaging in a disagreement over a unified issue. The book is composed of six chapters that alternate between Craig and Sinnott-Armstrong, so that each separate point can be discussed as it arises. Ideal for courses in the philosophy of religion and introduction to philosophy, this lively and direct dialogue will stimulate students and anyone interested in the existence of God, regardless of whether or not they believe in God.

Why Smart People Can Be So Stupid Robert J. Sternberg 2002-04-01 "A serious attempt to

understand a common phenomenon” from the author of *The Nature of Human Intelligence* (Psychology Today). One need not look far to find breathtaking acts of stupidity committed by people who are smart, or even brilliant. The behavior of clever individuals—from presidents to prosecutors to professors—is at times so amazingly stupid as to seem inexplicable. Why do otherwise intelligent people think and behave in ways so stupid that they sometimes destroy their livelihoods or even their lives? This is an investigation of psychological research to see what it can tell us about stupidity in everyday life. The contributors to the volume—scholars in various areas of human intelligence—present examples of people messing up their lives, and offer insights into the reasons for such behavior. From a variety of perspectives, the contributors discuss: The nature and theory of stupidity How stupidity contributes to stupid behavior Whether stupidity is measurable. While many millions of dollars are spent each year on intelligence

research and testing to determine who has the ability to succeed, next to nothing is spent to determine who will make use of their intelligence and not squander it by behaving stupidly. The contributors focus on the neglected side of this discussion, reviewing the full range of theory and research on stupid behavior and analyzing what it tells us about how people can avoid stupidity and its devastating consequences. “Marvelous, devilishly clever, and culturally timely book . . . A fascinating exploration.” —Choice “Easily readable and well referenced . . . May provide just enough momentum for change.” —International Journal of Intelligence

The Case for God Karen Armstrong 2009-09-22
From the bestselling author of *A History of God* and *The Great Transformation* comes a balanced, nuanced understanding of the role religion plays in human life and the trajectory of faith in modern times. Why has God become incredible? Why is it that atheists and theists

alike now think and speak about God in a way that veers so profoundly from the thinking of our ancestors? Moving from the Paleolithic Age to the present, Karen Armstrong details the lengths to which humankind has gone to experience a sacred reality that it called God, Brahman, Nirvana, Allah, or Dao. She examines the diminished impulse toward religion in our own time when a significant number of people either want nothing to do with God or question the efficacy of faith. With her trademark depth of knowledge and profound insight, Armstrong elucidates how the changing world has necessarily altered the importance of religion at both societal and individual levels. And she makes a powerful, convincing argument for structuring a faith that speaks to the needs of our dangerously polarized age.

[The God Conclusion](#) Charles Taylor 2018-09-13

Is God a delusion? Barrister Charles Taylor examines the evidence in this very readable book. His findings will be controversial to some but offer hope and insight to others. We are the only species unable to live in harmony with our environment and each other. The asteroid that killed the dinosaurs is nothing compared with our impact on the Earth. We are currently responsible for ?The Sixth Great Extinction? of wildlife. Religious terrorism is widespread, though current atrocities are dwarfed by the bloody record of Christianity. The Middle East is destabilised and to East and West we have Presidents Putin and Trump. So called `rational? thinking and the dominance of our left brains have brought us to the brink of disaster. We need a spiritual revolution allowing individuals to reconnect with their right brain, intuition and spirit. Religions have had their day. They contain key truths, but these truths are usually obscured by manmade rules constructed to gain wealth and power. At the other extreme, materialism

denies God, the spirit, free will, consciousness and love. Happily, the facts contradict this dispiriting left brained faith that we are deluded robots stumbling through life.

The Robin Hood Lies Frank Merlo 2012-09-29

The Socialists take from the Rich and give to the Poor and the Elites become the Masters of our Universe. The Elites are usually very charismatic and successfully influence the masses by giving good speeches. They seduce our children into believing there is no God, that there is no right or wrong, and that everything is grey. In this political environment, our children do not question President Obamas ties to William Ayers of the terrorist group, the Weather Underground, whom he describes as a mentor; or his vote for Abortion-on-Demand, which was far to the Left of Hillary Clinton. Nor do they challenge the negative attacks on Michelle Bachman who raised 23 foster children and yet is described as a bad person. Together, we are on a path to godlessness if no one stops the

Elites from demeaning Christian ministers as old-school, superstitious dinosaurs, who are merely relics from antiquity!

The Science of Intelligent Achievement Isaiah Hankel 2018-02-13 "this book will show you how to develop your focus by being very selective with where you spend your mental energy. If you've failed to reach an important goal because you were distracted, misinformed, or overcommitted, then you know the role focus and selectivity play in achievement. Second, you will learn how to stop allowing your happiness and success to be dependent on other people and instead, start taking ownership over your life. Finally, you will learn the art of changing your life through pragmatic decisions and actions. Self-improvement is not the result of dramatic changes. Instead, science has shown that personal and professional change is initiated and sustained by consistent, practical changes. To grow, you must leverage the power of micro-decisions, personality responsibility,

and mini-habits. Your own biology will not let you improve your life in any other way"--
The God Conclusion I. W. Brown 2015-09-09 It is an all too familiar path. A young person leaves home for college. He still believes in God and likely believes in the particular faith of his family. Then the deconversion begins. By the time he earns an undergraduate degree not only has he discarded the faith of his family, he has abandoned belief in God altogether. In fact, he looks back at his family and those who continue to believe in wonder. How can they still believe? It is a fact that the more education a person receives the more likely she is to become an atheist. A recent study also found that average intelligence is an excellent predictor of rates of atheism. That is, the higher the intelligence, the higher the rate of non-belief. It is natural to assume that intelligence and education give us a firmer grip on truth. Doesn't it make sense then that the individual who replaces faith with skepticism and disbelief is

the-god-conclusion-why-smart-people-still-believe

headed in the right direction? Shouldn't we conclude that this person is drawing closer to truth? Absolutely not! Having abandoned faith himself by the end of graduate school, author IW Brown then spent years examining the very best arguments for and against God's existence. In *The God Conclusion: Why Smart People Still Believe*, Brown makes a powerful case that the most educated and intellectual among us are often the furthest from the truth about God. They most certainly don't enjoy any advantage over the less educated when striving to understand existence and the transcendent. Vocal advocates of atheism regularly boast that the brainiest among us are non-believers. Contrary to what they would suggest, however, there is no reason to defer to the experts in science, philosophy, or academia when it comes to the God Question. *The God Conclusion* dispels the notion that intelligence and learning should lead to disbelief. It describes how and why rational, well-informed people still have reason

to believe in God. If you or someone you know struggles to maintain faith in God in the face of the wisdom of the world, The God Conclusion is for you!

The Not-Very-Persecuted Church Laura Hunt
2011-11-01 How do we live distinctively in communities embedded in the world around us?

The Not-Very-Persecuted Church provides church leaders, pastors, and Christians interested in community development with principles for evaluating culture in light of mission. Since we are called to live in community, the processes that build group identity can help us understand how to live together well. Paul addressed some of the problems that can occur in not-very-persecuted groups in the first four chapters of 1 Corinthians, and he shows us the way suffering forms identity in that context. With discussion questions and stories from personal interviews, this book offers both fascinating glimpses into the world of the first century and practical

applications for Christians today.

Personal Development for Smart People Steve Pavlina 2010-07 Despite promises of "fast and easy" results from slick marketers, real personal growth is neither fast nor easy. The truth is that hard work, courage, and self-discipline are required to achieve meaningful results - results that are not attained by those who cling to the fantasy of achievement without effort. Personal Development for Smart People reveals the unvarnished truth about what it takes to consciously grow as a human being. As you read, you'll learn the seven universal principles behind all successful growth efforts (truth, love, power, oneness, authority, courage, and intelligence); as well as practical, insightful methods for improving your health, relationships, career, finances, and more. You'll see how to become the conscious creator of your life instead of feeling hopelessly adrift, enjoy a fulfilling career that honors your unique self-expression, attract empowering relationships with loving,

compatible partners, wake up early feeling motivated, energized, and enthusiastic, achieve inspiring goals with disciplined daily habits and much more! With its refreshingly honest yet highly motivating style, this fascinating book will help you courageously explore, creatively express, and consciously embrace your extraordinary human journey.

CSB Apologetics Study Bible for Students, Trade Paper CSB Bibles by Holman 2017-07

Now updated with even more material, the CSB Apologetics Study Bible for Students anchors young Christians in the truths of Scripture by equipping them with thoughtful and practical responses when the core issues of their faith and life are challenged. A truly unique Bible created to encourage students to ask tough questions, get straight answers and strengthen their faith. The CSB Apologetics Study Bible for Students features the highly readable, highly reliable text of the Christian Standard Bible (CSB). The CSB stays as literal as possible to the Bible's original

meaning without sacrificing clarity, making it easier to engage with Scripture's life-transforming message and to share it with others.

Finding the One Dr. Russ Rasmussen
2022-08-05 Finding the One is the story of several single young adults wanting to find the "one" person with whom to share their lives. Whether the issue is trying to revive a previous relationship, overcoming an abusive past, or the problems of finally being on their own, the people have much to learn about how to do a relationship. Dr. Ken Nilsen returns to help these people communicate, understand each other, and get to know each other deeply. After many years of serving his clients, Dr. Russ Rasmussen wanted to convey his biblically rooted advice in a way that would not only be enjoyed but also be implemented and practiced daily. After tossing around a few ideas with author, Bible-study teacher, and friend Jeff Sievertson, Dr. Russ decided the best way to

bring his professional advice to life was through this continuing story of becoming one.

Becoming a Somebody Steven Nyczyk 2019-09-21 Ignat Kaneff arrived in Canada in 1951 with a mere five dollars to his name, no English, and very little education. Within five years, he had started a construction company and broken ground on his first subdivision, kicking off a career as one of the country's top businessmen. His is one of Canada's great immigrant success stories.

The God Con Lee Moller 2017-06-24 The crucifix is in! You can fool most of the people most of the time. In The God Con, Lee Moller, a life-long atheist and skeptic, looks at organized religion through the lens of the con. Organized religion has been selling an invisible product, that it never has to deliver, for thousands of years. It has given us bigotry, rampant pedophilia, terrorism, and bloodshed beyond imagining. And its acolytes have, in turn, given organized religion power over their bank

accounts, their reproduction, and their very "souls".

Even Dawkins Has a God Neil Laing 2014-08-27 Richard Dawkins's The God Delusion is one of the most serious attacks on religion in recent times. A number of highly capable authors have countered it. Neil's reply is different from most. He finds areas of agreement with Dawkins over a number of his assessments of religion while exposing his erroneous understanding of the nature of God. He shows that Dawkins's attack on God is irrelevant even though he successfully demolishes what he imagines is the Christian ?god?. At the same time, Neil tries to equip Christians to come to an informed intelligent position, to lose their fears of science, and to see its wonderful strengths. He challenges the assumptions made particularly by the New Atheists in imagining that faith is a childish approach to origins and furthermore that their own views are similar to some religions so that they virtually have a

?god? themselves. Tackling thorny topics like the meaning of faith, miracles, morality, and righteousness, Neil honestly appraises Christian views, tries to debunk misconceptions about these topics, and shows that science and faith can be mutually enhancing.

Apologetics Study Bible for Students, Trade Paper Sean McDowell 2010-02 The complete HCSB text is accompanied by dozens of articles collected from today's most popular youth leaders, including general editor McDowell.

You are Not So Smart David McRaney 2012 Explains how self-delusion is part of a person's psychological defense system, identifying common misconceptions people have on topics such as caffeine withdrawal, hindsight, and brand loyalty.

Why People Believe Weird Things Michael Shermer 2002-09-01 Revised and Expanded Edition. In this age of supposed scientific enlightenment, many people still believe in mind reading, past-life regression theory, New Age

hokum, and alien abduction. A no-holds-barred assault on popular superstitions and prejudices, with more than 80,000 copies in print, *Why People Believe Weird Things* debunks these nonsensical claims and explores the very human reasons people find otherworldly phenomena, conspiracy theories, and cults so appealing. In an entirely new chapter, "Why Smart People Believe in Weird Things," Michael Shermer takes on science luminaries like physicist Frank Tipler and others, who hide their spiritual beliefs behind the trappings of science. Shermer, science historian and true crusader, also reveals the more dangerous side of such illogical thinking, including Holocaust denial, the recovered-memory movement, the satanic ritual abuse scare, and other modern crazes. *Why People Believe Strange Things* is an eye-opening resource for the most gullible among us and those who want to protect them.

Living a Healthy Christian Life Madison Clark, Jr. 2012-12-20 This book is all about touching

the lives of people and encouraging them to live a rewarding and fulfilling life for Christ. It encourages them to keep a positive view on life as they understand why God created them to be living souls. It can help pinpoint what kind of shape your life is in and what makes you who you are. This book can enhance your prayer life and help you grow stronger in your faith, as you see that obedience to God helps you to be an overcomer. It's designed to help people understand the real meaning of forgiveness and why it is important to life. You will discover what real godly love has to do with life on a higher plan. You will learn the importance of being filled with the Holy Spirit. Best of all, when you read this book, you may discover what is your life's purpose.

Return to God: Men and Women Vladimir Živković Who am I and what is the world? Where do I come from? Where do I go? Does God exist? If it exists, where it can be found? What is he like? How does he look? Is God perfect, and does

he love me unconditionally? Is it true that I can't have a partner, live sexuality, have money eat and sleep well if I want to achieve happiness and God? If I love to live and to indulge my desires, does that mean that I'm sinful and that God doesn't like me? Does it have the sense to condemn people, you, God? Does it have the sense to love oneself, people, God? What's my path and what's my purpose? If I'm unhappy, how can I cure that? If I'm discontented, how much good is that? How much are self-respect, self-worth, and dignity important? What is the real knowledge, and how to recognize it? There are much more questions like this. This book deals with them. This book is not offering just mere answers to questions asked previously. It also offers guidance to the reader, who on its own, by perusing this book can consciously experience the truth presented in this book. The book 'Return to God' is composed of 3 parts, which together form a whole. Each part deals with the certain secret of life. The first part,

called 'Men and Women', gives us an insight into similarities and differences between the sexes. The modern men and women have their desires and their misconceptions. The first part of the book aims at helping the reader to separate the positive desires, to destroy hidden self-destruction and a bad course, to avoid mistakes, and to fulfill wishes and achieve happiness. This book helps a man gain fundamental and minimal dignity that is essential for happiness in love relationships and marriage. Therefore, it is essential to understand laws of the first part of trilogy 'Return to God', called 'Man and Women' as the prerequisite for marriage, love, and sexual relationships' happiness. Pay close attention to things you consider impossible. Biljana Obradovic, poetess and the writer of several novels from Valjevo will tell us more about the book: - Vladimir Zivkovic is a man dedicated to the lifelong study of the soul. His writing reveals calmness, consistency in his path to God, as the only light that sustains the inner

being. I really like his voice which pays special respect to everyone, especially to girls and women. By reading his works related to the faith in God, and therefore in you, I realized that the path of knowledge is difficult but fruitful. I realized that badly directed ego might destroy even the greatest minds, as well as biggest believers. Vladimir talks about the modesty life and balanced desires. Thus he shares his knowledge with others, to make them deeply think about the life they live nowadays, in the modern times. I hope he will publish more books to shed light on the path of the just and truly believing men. With due respect of this writing, I wish you success and a large number of readers! Maja Djolovic, translator and writer say about the book: - If you've just been searching for self-help reading and an easy and quick fix for your problems, there is no such advice in this book. Vladimir's trilogy 'Return to God' is an authentic collection of real life stories and situations which were created by the author as the result of his

personal spiritual journaling. His stories offer great insights into the modern life of man and women, their inner struggle, and problems they face in their search for meaning and true spirituality. The external influences of the corrupted individuals and society, as well as main reasons and internal sources of corruption, could be found in our closest surroundings. These stories, in a nutshell, deal with the current lack of morality, truth, and spiritual guidance in everyday life, as well in male-female relationships. Vladimir sheds the light on possible underlying problems and their true origin in human misconceptions, blurred moral vision, and false beliefs.

The God Conversation J. P. Moreland 2017-02-14
Every day it seems more difficult to explain to others what we believe and why. When our arguments fail to persuade them, what then? J. P. Moreland and Tim Muehlhoff say that the best way to win over others is with a good story. In this expanded edition of their classic book, the

authors give practical coaching and illustrations to help us communicate our faith more effectively.

The Intelligent Design Debate and the Temptation of Scientism Erkki Vesa Rope Kojonen 2016-04-28
The controversy over Intelligent Design (ID) has now continued for over two decades, with no signs of ending. For its defenders, ID is revolutionary new science, and its opposition is merely ideological. For its critics, ID is both bad science and bad theology. But the polemical nature of the debate makes it difficult to understand the nature of the arguments on all sides. A balanced and deep analysis of a controversial debate, this volume argues that beliefs about the purposiveness or non-purposiveness of nature should not be based merely on science. Rather, the philosophical and theological nature of such questions should be openly acknowledged.

Don't Tell Me Mark Schwieso 2022-08-19
Today, we live in a complacent country where

only certain answers are acceptable. In this book, the author dares to go against accepted wisdom, considering questions such as: • Is the divorce rate really 50%—and if it isn't, what is it and why should we care? • Why is the media telling us COVID-19 is so bad? • Do we really know Charles Darwin's theory of evolution to be true? • Has the Bible been disproven and debunked? Other topics include the Big Bang Theory, biological differences between men and women, politics and religion, random mutations, UFOs, and global myths. The author also explains that the best lies are 99% true—liars practice their craft using the truth to mislead others. Moreover, he notes that no matter what you believe, truth is still true. For instance, even if a person believes they can fly, if they jump off a ten-story building, they will still die upon hitting the ground. Join the author as he asks questions that the establishment would prefer you keep to yourself by reading *Don't Tell Me*.
Every Life Is on Fire Jeremy England

2020-09-15 A preeminent physicist unveils a field-defining theory of the origins and purpose of life. Why are we alive? Most things in the universe aren't. And everything that is alive traces back to things that, puzzlingly, weren't. For centuries, the scientific question of life's origins has confounded us. But in *Every Life Is on Fire*, physicist Jeremy England argues that the answer has been under our noses the whole time, deep within the laws of thermodynamics. England explains how, counterintuitively, the very same forces that tend to tear things apart assembled the first living systems. But how life began isn't just a scientific question. We ask it because we want to know what it really means to be alive. So England, an ordained rabbi, uses his theory to examine how, if at all, science helps us find purpose in a vast and mysterious universe. In the tradition of Viktor Frankl's *Man's Search for Meaning*, *Every Life Is on Fire* is a profound testament to how something can come from nothing.

CSB Apologetics Study Bible for Students, Black/Tan LeatherTouch Sean McDowell
2017-07 Now updated with even more material, the CSB Apologetics Study Bible for Students anchors young Christians in the truths of Scripture by equipping them with thoughtful and practical responses when the core issues of their faith and life are challenged. A truly unique Bible created to encourage students to ask tough questions, get straight answers and strengthen their faith. God's Eternal Gift: a History of the Catholic Doctrine of Predestination from Augustine to the Renaissance Guido Stucco 2009-06-20 Guido Stucco holds a Ph.D. in Historical Theology from

Sait Louis University. He is currently working on a book documenting the developments in the doctrine of predestination, from the Council of Trent to the Jansenist controversy.

God, Creation, and Revelation Paul King Jewett 1991 This is a print on demand book and is therefore non- returnable. A theology that is real, readable, and relevant -- such is Paul Jewett's God, Creation, and Redemption. Writing from a distinctively evangelical and Reformed viewpoint, Jewett offers a general, systematic introduction to these doctrines of the Christian church: how we know God (revelation and Scripture); who God is (the divine nature); what God is like (the divine attributes); and what God has done (creation). While upholding the historic Christian faith, Jewett's approach to Christian teaching is uniquely "neo-evangelical" in that he seeks to expound and clarify orthodox Christianity for Christians today: Jewett purposely sets forth his systematic theology in light of scientific and social issues that confront

the church in the contemporary world. Throughout the book Jewett also refers to literary masterpieces and to the church's hymns, giving the reader a greater appreciation for the theological treasures in our literature and our hymnody.

God for the Rest of Us Vince Antonucci 2015

Using personal anecdotes and Biblical teachings, a pastor writes about his work in Las Vegas, maintaining that God's love extends to all people, including those who think of themselves as sinners or unlovable and describing how such love can be transformative.

Greening Cities Puay Yok Tan 2017-03-29 This book offers an overview of recent scientific and professional literature on urban greening and urban ecology, focusing on diverse disciplines such as landscape architecture, geography, urban ecology, urban climatology, biodiversity conservation, urban governance, architecture and urban hydrology. It includes contributions in which academics, public policy experts and

practitioners share their considerable knowledge on the multi-faceted aspects of greening cities. The greening of cities has witnessed a global resurgence over the past two decades and has made a significant contribution to urban liveability and sustainability, as well as increasing resilience. As urban greening efforts continue to expand, it is useful to promote recent advances in our understanding of various aspects of planning, design and management of urban greenery, but at the same time, it is also important to realize that there are important gaps in our knowledge and that further research is needed. The book is organized in three main parts: concepts, functions and forms of urban greening. The first part examines the historical roots of greening cities and how the burgeoning field of urban ecology can contribute useful principles and strategies to guide the planning, design and management of urban greening. The second part shifts the focus to the diverse range of services - the functions - provided by urban

greening, such as those related to urban climate, urban biodiversity, human health, and community building. The final part explores conventional, often neglected, but important forms of urban greenery such as urban woodlands and urban farms, as well as relatively recent forms of urban greenery like those integrated with buildings and waterways. It offers a ready reference resource for researchers, practitioners and policy-makers to grasp the critical issues and trigger further studies and applications in the quest for high-performance green cities.

Why We Believe in God(s) J. Anderson Thomson
2014-07-01 In this groundbreaking volume, J. Anderson Thomson, Jr., MD, with Clare Aukofer, offers a succinct yet comprehensive study of how and why the human mind generates religious belief. Dr. Thomson, a highly respected practicing psychiatrist with credentials in forensic psychiatry and evolutionary psychology, methodically investigates the components and

causes of religious belief in the same way any scientist would investigate the movement of astronomical bodies or the evolution of life over time—that is, as a purely natural phenomenon. Providing compelling evidence from psychology, the cognitive neurosciences, and related fields, he, with Ms. Aukofer, presents an easily accessible and exceptionally convincing case that god(s) were created by man—not vice versa. With this slim volume, Dr. Thomson establishes himself as a must-read thinker and leading voice on the primacy of reason and science over superstition and religion.

CSB Apologetics Study Bible for Students, Gray/Navy LeatherTouch CSB Bibles by Holman
2017-07 Now updated with even more material, the CSB Apologetics Study Bible for Students anchors young Christians in the truths of Scripture by equipping them with thoughtful and practical responses when the core issues of their faith and life are challenged. A truly unique Bible created to encourage students to ask tough

questions, get straight answers and strengthen their faith. The CSB Apologetics Study Bible for Students features the highly readable, highly reliable text of the Christian Standard Bible (CSB). The CSB stays as literal as possible to the Bible's original meaning without sacrificing clarity, making it easier to engage with Scripture's life-transforming message and to share it with others.

Universals Versus Particulars: The Ultimate Intellectual War David Sinclair 2022-01-29

There's a huge hole in how humanity thinks about reality. The problem is a very old one, but only a tiny group of philosophers ever took an interest in it. To the average person, it's an obscure and unfathomable issue. To the truly intelligent, it's the key to understanding existence. To clarify this issue is to get rid of so much junk in the way of humanity's ability to explain reality. If you consider yourself one of the smartest people in the world, you have to do what unintelligent people never do, and that's to

become interested in the most rarefied topics, topics which seem absurd to the simple-minded, to the sort of people who aren't in the game of explaining reality and never could be. The topic of universals versus particulars is about as unlikely as it gets for understanding our existence, and yet that's exactly where we must look to find the ultimate answers. This debate allows us to make sense of a foundational problem of science: why science is totally dependent on mathematics even though the mathematical method contradicts the scientific method in every way. Mathematics is for thinking types (rationalists), science for sensing types (empiricists). These are two totally different types of people. Never get them confused. You have to choose a side. The supreme question is whether reality is scientific (material; particular; sensible) or mathematical (mental; universal; intelligible). To put it another way, is reality dead or alive? Is it a mechanism or an organism? Is it stupid, with no purpose, as

science says, or is it intelligent, and relentlessly calculating the answer to itself, and driving itself to perfect completion, as it must if it is mathematical? Are you smart enough to understand the answer? Most people aren't. According to Kurt Gödel, a global conspiracy has been in place for centuries to stop humanity from studying Leibniz, the supreme rationalist, and thus, through this neglect, to "make men stupid." There might as well be a global conspiracy given how far mathematical rationalism has fallen in order to create space for scientific empiricism, its philosophical opposite. Scientists, the people of the senses, even claim to be champions of reason and logic. As if! It's time for the greatest paradigm shift of all: from scientific empiricism to mathematical rationalism, from sensing to thinking, from observation to logic, from matter to mind.

Thinking About God Gregory E. Ganssle
2010-07-18 Can we really think about God? Can we prove God's existence? What about faith? Are

there good reasons to believe in the Christian God? What about evil? Can we really know with our finite minds anything for sure about a transcendent God? Can we avoid thinking about God? The real problem, says philosopher Gregory E. Ganssle, is not whether we can think about God, but whether we will think well or poorly about God. Admittedly there is a lot of bad thinking going around. But Ganssle, who teaches students, wants to help us think better, especially about God. He thinks philosophy can actually help. In the first part of this book Ganssle lays the groundwork for clear and careful thinking, providing us an introductory guide to doing philosophy. In the second part Ganssle then takes us through the process of thinking well about God in particular. He asks us to consider whether there are good reasons to believe that God exists. He thinks there are! In a third part Ganssle addresses the thorny issue of the existence both of God and of evil. He thinks there's a valid way through this problem. In the

final part Ganssle helps us thread our way through questions like: What is God like? What can God do? What can God know? How does God communicate? He thinks that there are some

clear answers to these questions, at least if you're talking about the God of Christianity. If you're looking for your first book for thinking clearly and carefully about God, then you'll appreciate the good thinking found in this book.
